Education:

York University - Lassonde School of Engineering

September 2023 - Present

Bachelor of Science (Honours), Computer Security (Co-op)

North York, Ontario

- Coursework: Computer Networks, Computer Organization, Data Structures & Algorithms, OOP, Intro to Computer Security
-

Skills:

- **Programming & Scripting:** Python, Java, JavaScript, TypeScript, SQL, HTML/CSS, PowerShell, BASH, Jira
 - **Cybersecurity Tools:** Tenable Nessus, Splunk, Wireshark, Linux, Maltego, Shodan, Networking Concepts
 - **Threat Hunting & Analysis:** Microsoft Defender for Endpoint, KQL, Network Forensics, Log Analysis
 - **Frameworks/Libraries:** React, Node.js, Express, Docker, Git, Jupyter Notebook, VirtualBox, WordPress
 - **Certifications:** ISO 9001 (QMS), ISO 27001 (ISMS), ISO 14001 (EMS), CompTIA Security+ (in-progress)
-

Experience:

Hydro One | IT Operation - Business Analyst

May 2026 - December 2026

- Deployed enterprise hardware via depot workflows, resolving Tier 2 help desk tickets to ensure seamless onboarding.
- Tested and packaged internal software into user-friendly installation packages for enterprise portal deployment.
- Provided software configuration, troubleshooting, and solutioning support to end-users to ensure optimal performance.
- Executed vulnerability management procedures by tracking, analyzing, and remediating security vulnerabilities detected across enterprise endpoints to maintain compliance and system security standards.

Cure Management Private Ltd. | ISO Compliance Intern

May 2025 - August 2025

- Conducted gap assessments across ISO 9001 (QMS) and ISO/IEC 27001 (ISMS) standards, identifying control gaps and nonconformities through interviews, process mapping, document review, and evidence verification.
- Implemented Integrated Management System that streamlined audit tracking, reduced response time on CAPA.
- Designed a complete document control system, including SOPs, policies, risk registers and CAPA, enabling audit readiness.
- Prepared compliance dashboards and reports, providing data-driven insights into risk trends, and recurring control gaps.
- Facilitated risk assessments and security awareness programs, embedding ISMS controls into quality processes.

Self Justice | Front End Development Intern

March 2025 - May 2025

- Optimized WordPress site performance and significantly enhanced mobile responsiveness across all major devices.
 - Built a chatbot-style support interface that improved user engagement by 25% and reduced navigation time by 40%.
 - Improved page load speed by compressing images, minimizing file overhead, and fine-tuning server configurations.
 - Maintained backend infrastructure through regular plugin updates, security audits, and database optimization.
-

Projects:

Vulnerability Management Program Implementation

- Simulated end-to-end Vulnerability Management Program using Tenable, Azure VMs, PowerShell, and BASH.
- Executed authenticated Tenable Nessus scans on Azure servers, identifying vulnerabilities by risk and exploitability.
- Developed scripts to address outdated software, insecure protocols, account misconfigurations, and missing OS updates.

Key Learnings: Vulnerability Management, Tenable/Nessus, Azure, PowerShell, BASH, Risk Assessment, Governance/Compliance

Threat Hunt Report: Unauthorized TOR Usage

- Performed a simulated threat hunt on an enterprise endpoint using Microsoft Defender for Endpoint, KQL, and Azure VMs.
- Used KQL to detect TOR install, browser execution, and network connections from file, process, and network logs.
- Built a timeline of attacker activity, confirming TOR browser usage and identifying suspicious file creation.

Key Learnings: Threat Hunting, Incident Detection & Response, Microsoft Defender for Endpoint, KQL, Windows Event Analysis, Network Forensics
